- PRE ASSEMBLED UPRIGHTS FOR QUICK INSTALLATION
- SAFETY YELLOW COATING FOR HIGH VISIBILITY
- MEETS OR EXCEEDS OSHA AND IBC STANDARDS
- AVAILABLE IN GALVANIZED STEEL OR ALUMINUM

CSI 05520  
February 2010

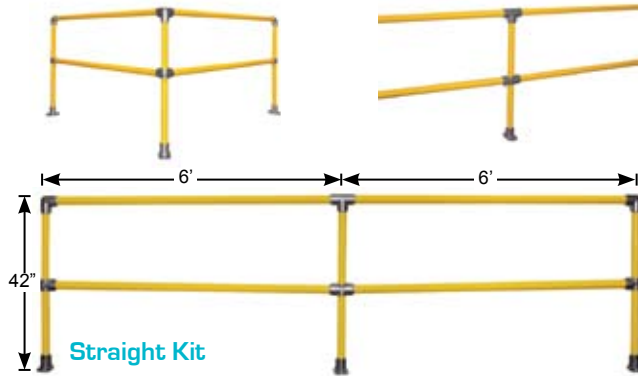

quick assembly safety railings available in straight, corner, and extension kits

KWIK KIT Safety Railing Kits allow you to create a sturdy railing system with no welding or threading. Because your uprights are pre-assembled, installation is fast and easy. By using a combination of our kits below, you can achieve almost any standard railing configuration. KWIK KIT Safety Railing Kits are easily assembled using a standard hex tool to tighten the large, easy-to-use set screws to 29 ft./lbs.. Rails can be cut where shorter sections are required. The kits can be secured using bolts or chemical anchors. (Bolts and chemical anchors not included.)

Corner Kit

6' Extension Kit

## Kwik Kit® Alternate Base Options

### Toe Board Option

Toe board: KEE KLAMP Type 69. Meets OSHA's requirement for toe board. Stainless steel hardware included. Easy to install with no drilling or welding.

### Ground Socket Option

Ground Socket: KEE KLAMP Type 66. Designed for concrete installations where uprights are required to be removable. It incorporates a socket set screw fixing on top of flange and can be supplied with a plug to fill the hole when the pipe is removed.

*Note: Alternate base may affect final price.*
